

# GUIDE TO THE PIXY GO

1. Power button
2. Type C output/input port
3. LED Indicators
4. Extruded wireless magnetic dock
5. Type-C charging cable

## 1 CHECKING REMAINING CHARGE

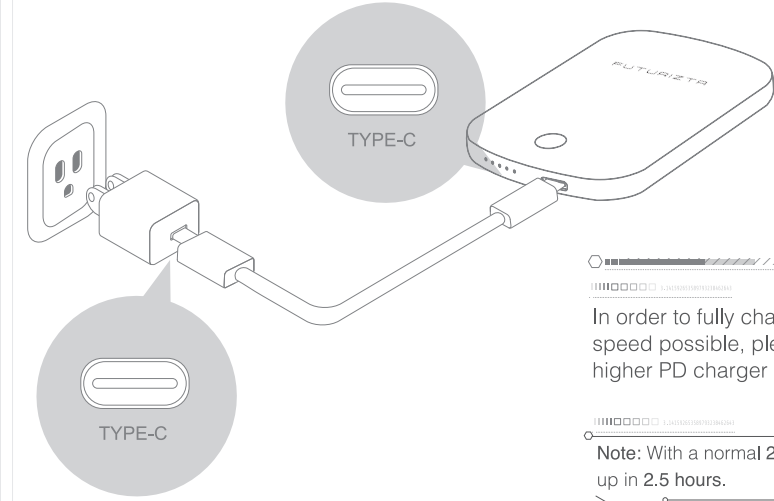

- ○ ○ ○ ○ < 25%
- ● ○ ○ ○ 25% – 50%
- ● ● ○ ○ 51% – 75%
- ● ● ● ○ 76% – 100%

- ○ ○ ○ ● Red - Device not detected
- ○ ○ ○ ● Green - Device detected

**LED indicator lights** Indicate the remaining battery charge that the power bank contains. Press the **POWER** button to check battery status. There are 4 LEDs with each LED representing 25% of charge.

**The 5th LED** serves as a status indicator, press the button once and if there are no wireless charging devices connected, the status indicator remains **red**. When connected with a compatible wireless charging device, the status indicator will turn **green**.

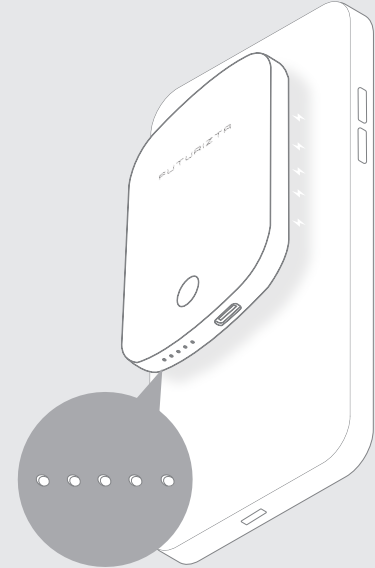

## 2 CHARGING YOUR PIXY GO

In order to fully charge up your Pixy Go at the fastest speed possible, please use a compatible **18W** or higher PD charger to fast charge it.

**Note:** With a normal **2.4A** charger, Pixy Go will charge up in **2.5 hours**.

## 3 MAGSAFE AND QI WIRELESS CHARGING

Click the power on button to turn on wireless charging. The status **LED indicator** will turn from **red** to **green** when connected to a wireless charge compatible device.

- ○ ○ ○ ● Red - Device not detected
- ○ ○ ○ ● Green - Device detected

**Note :** Pixy Go auto turns off when not used after a period of time however users have the option to manually turn Pixy Go off by pressing the power button twice.
